Conflict Minerals, Dodd-Frank Act

To Whom It May Concern:

The Dodd-Frank Act requires publicly held companies to disclose whether they manufacture products containing tin, tantalum, tungsten or gold from the Democratic Republic of Congo or various neighboring countries.

Wavelength Electronics uses tin, tantalum or gold only as components of our electronic products. We have queried our vendors and have determined that none of these minerals have been purchased from or originated in the conflict areas. We will not knowingly sell these materials from the conflict area and will continue our due diligence.

Authorized Signatory for Wavelength Electronics Inc.

Mary W. Johnson, CEO
